## OS-CON™ Polymer Aluminum Capacitors

### SXV & SXE Series

**Power Unleashed: High Capacitance, High Voltage, High Reliability**

Unlock unparalleled performance with the SXV and SXE Series of Panasonic's OS-CON™ capacitors. With voltage ratings up to 100V and capacitance up to 120 $\mu$ F, these capacitors enhance your device's efficiency and reliability. The SXV features a surface-mount format, while the SXE offers a through-hole option. Designed to withstand high temperatures of 125°C for 1000 hours, they provide an impressive estimated lifetime of 6.4 years at 90°C. Elevate your projects with OS-CON™ technology—contact us to learn more or request samples!

### Key Features

- High voltage (up to 100V)
- Large capacitance (up to 120 $\mu$ F)
- High reliability (125°C 1000 hours)
- No voltage derating required
- RoHS compliance, Halogen free

#### Industrial Applications

- Security Cameras
- Embedded Systems
- Sensor Interfaces

#### ICT Infrastructure

- Base Station
- Server

#### Renewable Energy Systems

- Solar Inverter
- Energy Storage Systems
- Smart Meter
